

NO GAS.

Why are they
ramping up
the Price of
Gas?

Did you know...

The Victorian Government plans to **completely phase out gas** within 3 years. This will make all your Gas Appliances including heaters, hot water services and cooktops obsolete. All in the name of reducing “carbon emissions” by up to 50%.

They are proposing to let a few solar panels, turbines etc (called renewable electricity) to do the trick to run the entire state. **Australia has an abundance of natural resources, so why are they shutting off our supplies?**

Fun Fact: Almost half of the nation's total residential gas consumption is used solely to heat Victorian homes.

VICTORIAN GOVERNMENT WANTS TO TAKE AWAY YOUR GAS.

Turn over the page and let's see the real facts...
